Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at http://about.jstor.org/participate-jstor/individuals/early-journal-content.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

An Introduction to Mathematical Analysis

Mathematics of Finance

By

H. L. RIETZ,
Professor of Mathematics, University of Iowa

A. R. CRATHORNE,
Assistant Professor of Mathematics, University of Illinois

J. C. RIETZ,
Actuary of the Midland Mutual Life Insurance Company

A teachable elementary course in the application of mathematics to financial problems.

Interest
Annuities certain
The sinking fund method of paying a debt by periodic instalments
Valuation of bonds and other securities
Mathematics of depreciation
Operation of funds in building and loan associations
The theory of probability with special reference to its application in insurance
Life annuities
Net premium for some simple forms of life insurance
Value of life insurance policies

CONTENTS

The November Meeting of the Iowa Section. By Professor J. F. REILLY.. 1

The November Meeting of the Missouri Section. By Professor P. R. RIDER 2

The December Meeting of the Maryland-Virginia-District of Columbia Section. By Professor G. R. CLEMENTS 4

The Organization of College Courses in Mathematics for Freshmen. By Professor J. W. YOUNG 6

Some Curious Fallacies in the Study of Probabilities. By Professor R. E. MORITZ. Part I 14

The Use of an Existence Theorem in Developing the Properties of the Sine and Cosine. By Dr. H. T. DAVIS 19

The Effect of Change of Scale on Curvature. By Professor J. K. WHITTEMORE 22

QUESTIONS AND DISCUSSIONS: Discussions—The "Most Pleasing Rectangle" by Professor A. A. BENNETT; "Note on the Summation of Series" by Mr. LOUIS WEISNER 27

RECENT PUBLICATIONS: Reviews by Professors ARNOLD DRESDEN, M. B. PORTER, A. A. BENNETT. Articles in Current Periodicals 31

UNDERGRADUATE MATHEMATICS CLUBS: Club Activities—Brown University, Cooper Union, Syracuse University 39

PROBLEMS AND SOLUTIONS: Problems for Solution—**2999–3003.** Solutions—**2908, 2910, 2912, 2913, 2923, 2925** 41

NOTES AND NEWS 45

EDITORIAL CORRESPONDENCE AND BOOKS FOR REVIEW should be addressed to the EDITOR-IN-CHIEF for 1923, W. B. FORD, 204 Mason Hall, Ann Arbor, Mich.

BUSINESS CORRESPONDENCE should be addressed to the SECRETARY-TREASURER of the Association, W. D. CAIRNS, Oberlin, Ohio.

Eighth Summer Meeting of the Association, Vassar College, September 5–6, 1923

Eighth Annual Meeting, University of Cincinnatti, December, 1923

The following are dates of Section meetings of the Association in 1923 (unless otherwise specified):

ILLINOIS, Knox College, Galesburg, May 4–5

IOWA, Cornell College, Mount Vernon, April 27–28

KANSAS, Topeka, January 20

KENTUCKY, University of Kentucky, Lexington, April

MARYLAND-VIRGINIA-DISTRICT OF COLUMBIA, Baltimore, May 12

MINNESOTA, St. Paul, May 27

MISSOURI, University of Missouri, Columbia, November 30–December 1

OHIO, Ohio State University, Columbus, March 30–31

ROCKY MOUNTAIN, University of Colorado, Boulder, April

SOUTHEASTERN, Agnes Scott College, Decatur, March 10

TEXAS, Houston, December 1–2

THE NEW ERA PRINTING COMPANY

LANCASTER, PA.

is prepared to execute in first-class and satisfactory manner all kinds of printing and electrotyping. Particular attention given to the work of Schools, Colleges, Universities, and Public Institutions.

Books, Periodicals

Technical and Scientific Publications

Monographs, Theses, Catalogues

Announcements, Reports, etc.

All Kinds of Commercial Work

(*Printers of the Bulletin and Transactions of the American Mathematical Society, etc., etc.*)

Publishers will find our product ranking with the best in workmanship and material, at satisfactory prices. Our imprint may be found on a number of high-class Technical and Scientific Books and Periodicals. Correspondence solicited. Estimates furnished.

THE NEW ERA PRINTING COMPANY

Wiley Mathematical Books

READY EARLY IN JANUARY

FIRST COURSE IN THE THEORY OF EQUATIONS

By LEONARD EUGENE DICKSON, Ph.D.,
Professor of Mathematics, University of Chicago.

A SIMPLE introduction to the theory of equations which will serve the needs of students who are either beginning calculus or have just taken a first course in differential calculus. Suitable topics have been carefully selected and presented with the utmost clearness and simplicity.

Valuable suggestions, obtained from numerous teachers who give courses in the theory of equations, have been incorporated, and the manuscript has been carefully criticized by various leading experts.

This book will have about 160 pages, and will be fully illustrated with clearly executed cuts. The binding will be cloth.

This Book Has Been Well Received.

PLANE TRIGONOMETRY.

By ARNOLD DRESDEN, Ph.D., Assistant Professor of Mathematics, University of Wisconsin.

In the short time that this new book has been on the market (published August, 1921) it has met with a cordial reception, several large institutions having adopted it as the required text on elementary trigonometry. The treatment is adapted to the stage of logical development which may be expected of students who begin the study of trigonometry.

110 pages. $5\frac{1}{2}$ by $8\frac{1}{2}$. 58 figures. Cloth, $1.60 postpaid.

An Established Standard on Geometry.

ANALYTIC GEOMETRY.

By MARIA M. ROBERTS, Professor of Mathematics, and JULIA T. COLPITTS, Associate Professor of Mathematics, Iowa State College.

Much stress is placed on the first two chapters, in which the student is building the concepts on which the future chapters rest. Numerous exercises, varied in character, are given, enabling the teacher to select those which best emphasize the points which he considers important.

229 pages. 5 by $7\frac{1}{4}$. Illustrated. Cloth, $1.75 postpaid.

Enter your order NOW for copies on 10 days' Free Examination—of "Dickson" when ready—of "Dresden" and "Roberts & Colpitts" at once.
